IRON FILTER LET

LET BRONZE LINE

Prevent Staining & Build-Up

Filters treat water to protect pipes, faucets, water heaters, boilers, and other appliances that require the use of water. As a result, water stains are eliminated, and the water system of your entire house will remain clear to maintain functionality.

Chemical Free Water Filtration

Utilizing physical filtering media to collect water contaminants rather than using chemicals to alter the contaminants within the water allows the system to provide your home with safe and healthy water.

IRON FILTERS LETIM

BRINGING YOU TECHNOLOGY AND PERFORMANCE, OUR LET BRONZE LINE IRON FILTER PROVIDES CLEAN WATER FREE OF STAINING AND TASTE-ALTERING CONTAMINANTS.

HOW IT WORKS:

1. Untreated water enters the LET Bronze Line Iron Filter and flows through the media.
2. Iron and manganese are removed via oxidation and capturing the precipitates.
3. Treated water enters your home free of staining iron and manganese.
4. The LET Bronze Line Iron Filter will backwash at preprogrammed intervals, keeping the media clean and loosely packed, so that it can continue to remove contaminants from water.
