## WATER TREATMENT

*Est. 1942*

### Prevent Staining & Build-Up

Filters treat water to protect pipes, faucets, water heaters, boilers, and other appliances that require the use of water. As a result, water stains are eliminated, and the water system of your entire house will remain clear to maintain functionality.

### Chemical Free Water Filtration

Utilizing physical filtering media to collect water contaminants rather than using chemicals to alter the contaminants within the water allows the system to provide your home with safe and healthy water.

### Reduced Water & Energy

The Up-Flow filters are designed as a simple and effective method to treat the water in the house without the requirement of electricity or backwashing water to drain.

# CARBON FILTER UFCT

OUR UP-FLOW CARBON FILTER PROVIDES YOUR FAMILY WITH WATER FREE OF CONTAMINANTS THAT NEGATIVELY IMPACT THE COLOR, TASTE, AND ODOR.

## HOW IT WORKS:

1. Untreated water enters the Up-Flow Carbon Filter and flows through the media.
2. The media's porous surface captures organic molecules.
3. Treated water enters your home free of color, taste, and odor altering organics.
4. The Up-Flow Carbon Filter perpetually, slightly lifts the media with water flow to prevent compaction so that it can continue to remove contaminants from incoming water.
